

Zohaib Zeeshan

Data Engineer & Full Stack Developer

ds.zohaibzeeshan@gmail.com | +92-333 3287807 | Multan, Pakistan

SUMMARY

Data Engineer with experience helping organizations turn complex and disconnected data into structured, analytics-ready systems. Skilled in developing automated data pipelines, designing scalable data architectures, and ensuring data quality to support accurate reporting and informed business decisions. Committed to building efficient, reliable solutions that reduce manual workloads, improve visibility, and help businesses grow through data-driven insights.

PROFESSIONAL EXPERIENCE

Sr. Data Engineer

S&N Textiles Ltd. (Remote)

Sep 2022 – Present

- Co-designed and structured data models for Odoo ERP implementation, supporting Inventory, Accounting, CRM, and HR operations.
- Translated complex textile manufacturing workflows into scalable digital processes, improving operational visibility and data consistency.
- Developed data structures and reporting foundations to track inventory valuation, production activities, revenue, and business performance.
- Collaborated with stakeholders to align business requirements with scalable data and process solutions.

Data Engineer & Analyst Intern

DevelopersHub Corporation (Remote)

Apr 2026 – May 2026

- Built ETL pipelines and transformed raw data into analytics-ready datasets using SQL and data modeling techniques.
- Collaborated with senior engineers to design data structures that supported reporting, business intelligence, and decision-making.
- Improved data quality and consistency through cleaning, validation, and transformation workflows.

MERN Stack Developer Intern

Tekvion Solutions (Hybrid, Islamabad)

Sep 2025 – Feb 2026

- Developed and deployed full-stack web applications using MERN technologies and Bubble.io .
- Worked on client-facing projects, translating business requirements into responsive and scalable digital solutions.
- Leveraged AI-assisted development workflows to accelerate delivery while maintaining code quality and functionality.

PROJECTS

OpenSky Network Data Pipeline

Built a real-time aviation data pipeline that ingests, transforms, and stores live flight data, delivering operational insights through automated workflows and interactive dashboards.

Walmart eCommerce Intelligence Platform

Engineered scalable ETL pipelines processing large-scale Walmart marketplace data, transforming raw product information into actionable insights for product research, brand analysis, and market intelligence.

Orderly | Cloud-Based Restaurant POS

Developed a modern restaurant POS platform, enabling real-time inventory tracking, QR ordering, sales analytics, and seamless operational management through cloud-based infrastructure.

EDUCATION

Cambridge O/A Levels | Bahria College

Focused more on professional development, entrepreneurship, and gaining hands-on industry experience through real-world projects and continuous learning.

09/2022 – Present
Islamabad

CERTIFICATES

Codanics: Machine Learning & Artificial Intelligence | **Anthropic:** Claude Code in Action

SKILLS

Data Modeling | ETL Pipelines | Data Warehousing | Data Lakes | Analytics Engineering | Data Processing | Data Transformation | JavaScript | Database Querying | PostgreSQL | Node.js | React.js | MongoDB | REST APIs | Backend Development | Apache Spark | Git & Docker | Apache Airflow | Snowflake & dbt | Microsoft Azure

ACHIEVEMENTS

Kaggle 3x Expert, Honored to be a 2x & Lagacy Kaggle Expert

05/2024 – Present
